

Poojana Kaveesh Sellaheewa

BSc (Hons) Information Technology Undergraduate | SLIIT

BACKEND | AI SYSTEMS | CLOUD | IoT

github.com/teldigi5-wq

linkedin.com/in/poojana-kaveesh-3048b8387

PROFILE

Systems-focused IT undergraduate building practical software across backend engineering, AI-enabled platforms, cloud-native tooling and connected devices. I learn by turning concepts into working projects, documenting decisions and improving the system through evidence.

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

Undergraduate

BSc (Hons) Information Technology - Faculty of Computing

FEATURED PROJECTS

Aetheris Platform

Java 21 / Spring Boot / PostgreSQL / Redis / RabbitMQ / Docker / Kubernetes / Helm

Staged backend platform exploring service boundaries, identity, messaging, caching, observability, container-first deployment and governed AI-agent direction.

FloodGuard

Arduino / ESP8266 / Firebase / Node.js / AWS EC2

IoT flood monitoring prototype connecting physical water-level sensing to cloud monitoring and WhatsApp alerting.

AnyDL Pro Ultra

Electron / React / TypeScript / Node.js / FFmpeg

Windows desktop media tool integrating process control, progress feedback and packaging experiments behind a focused UI.

TECHNICAL TOOLKIT

Languages Java, Python, JavaScript, TypeScript, C/C++
Data PostgreSQL, MySQL, Redis, Firebase
AI Systems Local AI, LLM integration, agents, automation

Backend Spring Boot, REST APIs, JWT, RBAC
Cloud / DevOps Docker, Compose, Kubernetes, Helm, AWS
IoT / Tools Arduino, ESP8266, Git, Postman, Linux, Figma

ENGINEERING FOCUS

System design | API design | security awareness | deployment readiness | observability | documentation | continuous learning
